Guide to developing the Annual Implementation Plan: for Improving Student Outcomes

To focus effort where it is most needed, four priorities have been identified for the entire Victorian government school system. The four priorities are:

- Excellence in teaching and learning
- Professional leadership
- Positive climate for learning
- Community engagement in learning.

Six evidence-based initiatives assist schools to identify and utilise the most effective, relevant and evidence-based strategies that when implemented with consistency and depth help drive improved student outcomes. The initiatives are associated with the four state-wide priorities, in the following way (please refer to the *Framework for Improving Student Outcomes: Guidelines for schools*):

Priority	Initiatives
Excellence in teaching and learning	Building practice excellence: Teachers, principals and schools will work together
	Curriculum planning and assessment: School will embed a culture of curriculum planning, and assess the impact of learning programs, adjusting them to suit individual student needs
Professional leadership	Building leadership teams: Schools will strengthen their succession planning, develop the capabilities of their leadership teams in using evidence
Positive climate for learning	Empowering students and building school pride: Schools will develop approaches that give students a greater say
	Setting expectations and promoting inclusion: Schools will work across their communities to implement support to health, wellbeing, inclusion and engagement of all students
Community engagement in learning	Building communities: Schools will strengthen their capacity to build relationships with the broader community by partnering

To guide the development of the 2016 Annual Implementation Plan: for Improving Student Outcomes (AIP) schools will work with support from Senior Education Improvement Leaders (SEIL) to conduct an annual evaluation of student outcomes data against the targets set in their School Strategic Plan. Schools then diagnose the issues requiring particular attention and select one or more initiative.

Principal and teacher performance and development plans include explicit links with the AIP and the School Strategic Plan. This ensures a line of sight from school improvement priorities and initiatives to each individual's plan. The *Guidelines* provide further context and detailed information to support this work.

Initiatives Rationale:
<p>Explain why the school, in consultation with the SEIL, has selected this initiative/s. Please make reference to the evaluation of school data, the progress against SSP targets, and the diagnosis of issues requiring particular attention.</p> <p>At Buckley Park College, we're focused intensively on improved learning and teaching practice across our school. In our School Strategic Plan, we've set the following goals which further inform the rationale behind these improvement areas now in 2016:</p> <ul style="list-style-type: none"> ✓ To improve individual student learning growth ✓ To improve student learning outcomes for all students, regardless of their level ✓ To increase real opportunities for meaningful student voice and choice across our school <p>To achieve these broad goals, we've planned for a renewed focus on our instructional practice across the school. In 2015, we've reviewed and redesigned the new BPC Instructional Framework. We've linked this to various improvement methodologies like: classroom observations and structures for more purposeful feedback. Now, as we plan for 2016, we will drive this work forward to build, evolve and ultimately embed our instructional framework in teachers' practice, to work toward improved student learning outcomes, as measured by learning growth (and the VCE) over time.</p> <p>We've consistently diagnosed learning growth as being our absolute area of focus at Buckley Park College. Our results are generally very pleasing but we're mindful of the significant social, emotional and intellectual capital students bring to our school when they enrol at Year 7. We are then committed to ensuring that we are adding value to all students' learning, regardless of their starting point – all students must achieve absolute minimum 12 months progress in 12 months. This need will be addressed through our team focus on assessment this year, our involvement in the Insight Assessment pilot and our professional learning strategy. We are also focused at all levels on how we differentiate the curriculum to ensure accurate teacher judgements against the AusVELS and we've set targets for benchmark goals of students achieving A or B as measured by AusVELS.</p> <p>It is through this diagnosis of our most pressing needs that we have decided to focus our efforts most closely this year on the below KIS.</p> <p>Coupled with our learning and teaching focus will be furthering opportunities across our school to provide opportunities for student voice and choice, as well as developing intentional structures and strategies to build a positive climate where the importance of wellbeing is understood, valued and esteemed by all. In 2015 we've begun to re-imagine how wellbeing can be taught through our early work with our Connections structure. This has now been planned into the school more systematically and in 2016, we will be focused on this work as one of our key strategies to empower students and build school pride.</p> <p>We believe that these 2 priority areas: Excellence in Teaching and Learning and Positive Climate for Learning are inextricably linked. In 2016, we will also begin our new approach to our unitised curriculum at Year 10 which has enabled student choice and voice, and has compelled teachers to focus closely on curriculum planning, assessment and building practice excellence. This work also clearly fits these priorities and will be a focus for us at Buckley Park College in 2016.</p>

Key Improvement Strategies (KIS)

List the KIS that are linked to this initiative/s and will be scaled up. This could include existing KIS from your SSP or new ones identified through the evaluation of student outcomes against SSP targets and the diagnosis of issues requiring particular attention. KIS may be specific to one outcome area or applicable across several areas.

Initiative:	KIS
	<p>Excellence in Teaching and Learning</p> <ol style="list-style-type: none">1. Maximise learning opportunities for all students from years 7 to 9 with an emphasis on those who have not yet reached standards (particularly in mathematics) and meaningfully extending the more able students, through the use of differentiation and intervention strategies.2. Maximise learning opportunities for all students from years 10-12 with an emphasis on increased student curriculum choice, as well as supporting and extending through better differentiation, extension and intervention strategies.3. Review the core purpose of a common approach to instruction and then deeply embed the College instructional model into teachers' practice
	<p>Positive Climate for Learning</p> <ol style="list-style-type: none">1. To improve opportunities for meaningful student choice and voice by refining and improving timetabling, policies, counselling, pathways and transitions at years 9-12.2. There will be particular focus on aligning Year 10 with Year 11 and 12 to create a Later Years 'sub-school' where students are encouraged to enter VCE earlier and where the sub-school facilitates personalised student decisions.3. Develop and implement consistent student engagement strategies across the Middle Years and Later Years sub-schools, that may include: lunch time activities, form captains, extra-curricular programs, fundraising,4. Develop and implement a whole school student/teacher feedback tool, which will systemize our approach to seeking feedback from students to esteem their voice and improve teaching practice.

Annual Implementation Plan: for Improving Student Outcomes

ENGAGEMENT					
Goals	To increase real opportunities for meaningful student voice and choice across our school.	Targets	1. The Student Attitudes to School survey data to be at or above the 70 th percentile in all variables from Years 7 – 9. 2. The Student Attitudes to School survey data to be at or above the State in all variables from years 10-12. 3. Improvements in the variables of: stimulating learning, teacher empathy and teacher effectiveness to be immediate in 2015 across the school
